

# The AI-Platform for making your interview structured

"This is an virtual interview environment with real ice-breaking room of questions supporting speech recognition, and multilingual support."

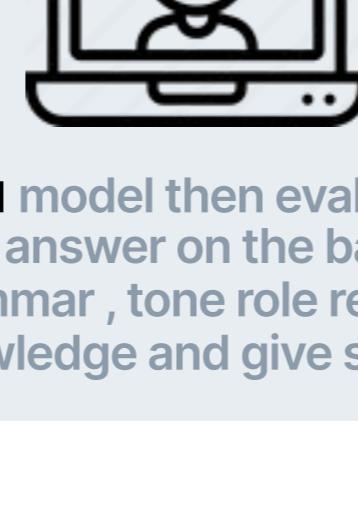

[Start Interview](#)

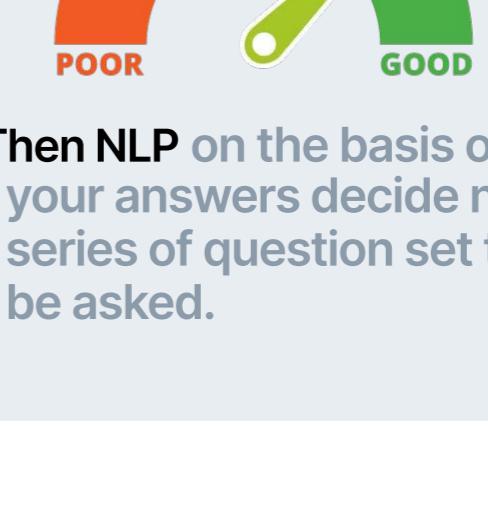

## Let's Understand how we evaluate you!

You give answer in subjective form which can be recorded with speech

Our AI model then evaluates your answer on the basis of grammar, tone role related knowledge and give score.

Then NLP on the basis of your answers decide next series of question set to be asked.

## DRDO • RAC • INTERVIEW • SEC

HOW SECURE?

### To solve the issue of cheating we have used Security Checks

#### Face Identity

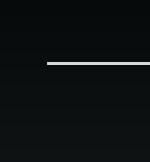

First your face id will be saved, which will be further verified during the interview also if it changes during exam, your interview fails.

#### Speech Recognition Check

Your speech will play a major role, as it will be checked and saved, so that during interview, we can verify its you, and you can record.

#### Screen Lock

Once your Interview Started, your window will be locked in fullscreen mode and no further changes allowed, on quitting or changing screen, interview fails.

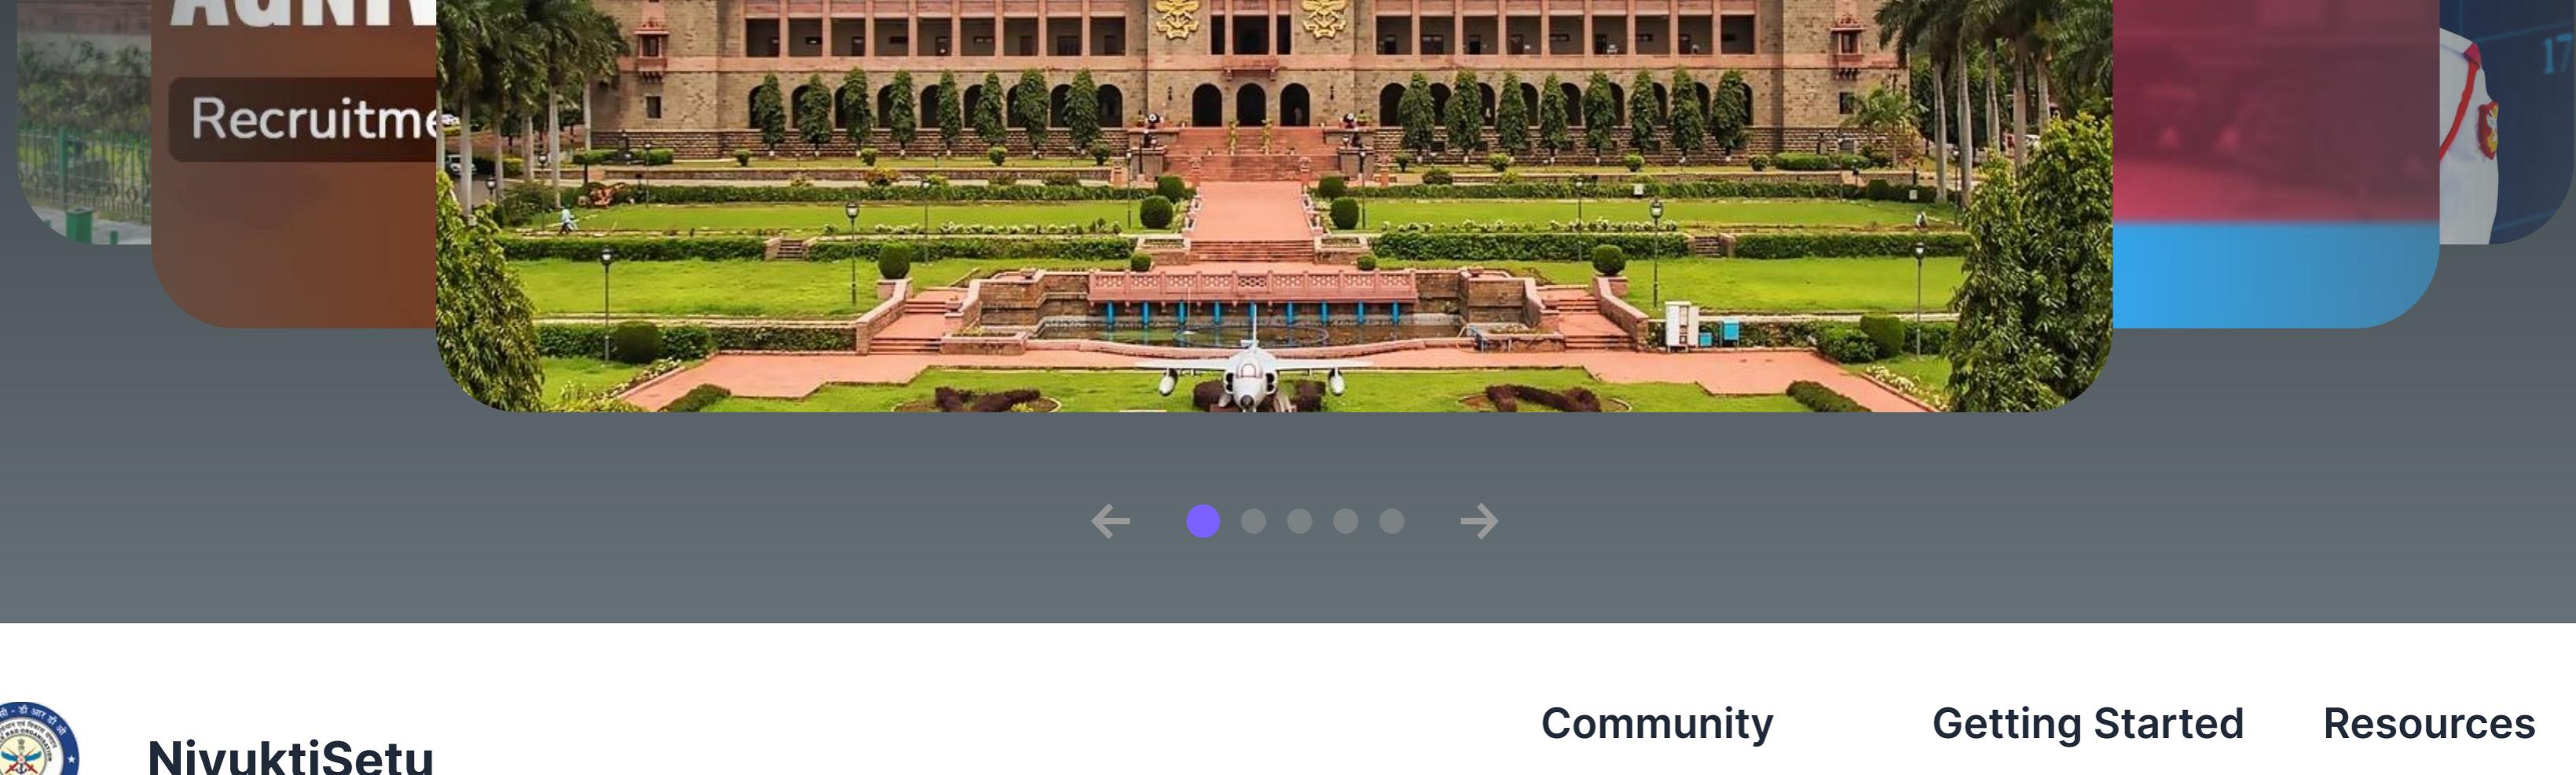

#### Lastly Your Consent

All these features will be implemented, if you want to proceed, without passing all 3 safety checks no interview or mock interview allowed.

## UPCOMING EXAMS 2024
